Profiling and Id portal

Tools

Programming

- PHP
 - Have a wide-range of understanding on PHP OOP with over 5 years of development experience. Have used various PHP frameworks over the past years.
- Js
 - Good understanding and skill set on native/ vanilla js.
- JQuery
 - Wide-range skills on using the library from using various listeners and calls from common interaction to ajax and json request.
- My SQL
 - Have used this tool on all of my projects and got a wide understanding on creating, updating and deleting entries./data and joining tables.
- Git
 - Used on some wide/huge project with two or more colleagues/developers. Got great understanding on git commands and repositories.

Tools

Frameworks

- Codeigniter
 - A MVC PHP frame that I recently use to build a profiling and id generator web application. Which use to record employee and generate an id layout. With email notification system and 2 auth password reset system.
- Wordpress ***
 - The most recent and common framework I use for designing and developing a blog website or ecommerce website. Have developed custom functions and shortcodes for custom functionalities and commonly plugin and theme modifications.
- CakePHP
 - Have use this to build a Donation monitoring and record system for a Radio company. It save records of the person or organization that want to donate to the radio company and monitored real time it via use of js graphs.
- Magento
 - I use this framework to modify and customized function and layout design on an existing ecommerce website.

Wordpress Tools

- Elementor
- Beaver Builder
- Divi
- Kadence
- Woocommerce
- Advance Custom Fields
- Gravity Forms
- * Woocommerce modifications
- * Custom Functions/Shortcode
- * Plugin and Theme modifications

Web Design / Development

- HTML
- Css
- Sass/Scss
- Bootstrap
- Material Design
- Figma

Graphic Design

- Adobe Photoshop
- Adobe Illustrator
